

PARTNERSHIP BROCHURE

4th KOP Conference

22-23 April 2020, Warsaw, Poland

**ASSET MANAGEMENT, MAINTENANCE AND
RELIABILITY CONFERENCE IN CENTRAL EUROPE**

Knowledge, Operations, Performance

INVITATION TO PARTICIPATE IN THE MOST EXCITING ASSET MANAGEMENT, MAINTENANCE AND RELIABILITY CONFERENCE IN CENTRAL EUROPE

It is with enormous pleasure that we invite you to Warsaw for the 4th KOP Conference. KOP stands for Knowledge, Operations, Performance in connection with Asset Management.

KOP is an international conference held in English, which provides a unique opportunity to discuss specific maintenance and operation solutions in the European region.

While transitioning into the next decade, we need to find together the best solutions to deal with cost optimization, lower failure rate and high availability expectations. Only a collaborative and coherent approach from all business sectors will allow us to improve in a systemic way. The KOP conference brings together people from various industries (pharmaceutical, oil & gas, chemicals, manufacturing, automotive, FMCG, to mention but a few) to share experiences and find new ways to improve asset management and maintenance benefits.

The conference will attract more than 150 delegates from Central Europe and offers you an excellent forum to highlight your expertise and involvement in the areas of maintenance and production with case-studies, practical presentations and workshops.

We invite you to Warsaw, the capital of Poland, to meet and share ideas on how we can better work together to prepare for improvement and change in the future.

SEAM Group Europe

ABOUT KOP Conference

On April 2020, we are meeting in the centre of Europe to discuss the key issues related to maintenance, asset management and reliability. The Conference consists of 2 days of workshops and lectures led by practitioners.

At the 4th KOP 2020, we will present studies and develop a pathway to the next level of maintenance.

Key topics at KOP Conference 2020:

- Asset management strategy development
- PM lean development and optimization
- IT systems and smart solutions for maintenance
- Spare parts (MRO) management
- Availability improvement tactics
- EAM / CMMS systems
- Effective communication and collaboration
- Mechanical integrity
